FILTER MEDIA DATA

SEW 141 is a 100% PTFE coated spun bond filters media that is manufactured from continuous fibre which does not permit the particles to become embedded.

SEW 141 is very rugged and has a high burst strength that makes it resistant to abrasion, water, heat, and chemicals.

100% Spun bond media makes pulse cleaning easier and is running with a lower pressure drop. SEW 141 is a washable filter media.
